

Windows Software Developer

Global Security Devices (GSD), based in Dublin, design and manufactures both wired and wireless security products for the Irish and European markets has an opportunity for a 'Windows Software Developer'. GSD is committed to strengthening its highly experienced R&D team and is continuously developing high quality products.

Based in the Dublin office - The main focus points of the position are as follows:

- Primarily responsible for extending and maintaining our existing Windows Software
- 2+ years as a C# Software Developer (more experience desired)
- B.S. in Computer Science
- Excellent written and verbal skills
- Demonstrate strong analytical and problem solving skills
- Ability to adapt to changing priorities and to thrive in a fast-paced work environment
- Ability to work well with other individuals
- Experience in Microsoft Visual C#.Net & MFC Windows API and Base Services (32 bit and 64-bit), Inter Process Communications, Database Programming, OLEDB, SQL, ODBC, ADO

Following experience or attributes are highly desirable:

- Windows Sockets, TCP/IP, Serial Communication Protocols Security and Encryption Algorithms Full Software Development Lifecycle

A generous package is on offer for the right candidate which will reflect the responsibilities of the position. With this in mind GSD would like to invite candidates who feel they could fill this role to forward their CV either by email or post to:

Myles Glynn,
Global Security Devices,
